ADAM GURYSH

Pittsburgh, PA - 267-371-0268 - agurysh99@gmail.com

SUMMARY

Software engineer with 4 years of experience building production web applications with React and TypeScript. Experienced in frontend architecture, reusable component design, application performance, automated testing, accessibility, and AI-powered product workflows. Passionate about building tools that people enjoy using.

EXPERIENCE

Minitab

Software Engineer II *Jan 2026 - Present*

- Collaborated across engineering teams, built shared workflows across three seperate products supporting thousands of daily users
- Optimized application architecture and state management to improve performance and scalability. Reduced the time required to share data between the integrated products by over 65%.
- Mentored junior engineers and participated in code reviews.
- Identified UX concerns arising from complex cross-application workflows, communicated tradeoffs and potential solutions to project stakeholders.
- Built the initial prototype for an AI-powered natural-language workflow that is now used daily by customers worldwide.

Minitab

Software Engineer *Jun 2022 - Dec 2025*

- Modernized and maintained a legacy .NET web application and helped containerize it for deployment with Kubernetes.
- Collaborated with quality engineers to review requirements and acceptance criteria, conduct pair testing, and identify usability concerns before release.
- Built core functionality for a new data-preparation tool, including a virtualized data grid and interactive charts.
- Built reusable, composable React components for a shared design system used across multiple applications.
- Planned and delivered features with automated Playwright and Jest test coverage, screen-reader and keyboard navigation support.

SKILLS

Frontend:	React, TypeScript, JavaScript, HTML/CSS, Redux, TanStack Query, Highcharts, React Flow
UI Engineering:	Component architecture, design systems, WCAG accessibility
Backend & Data:	Node.js, .NET, Go, Gin, Python, REST APIs, SQL, PostgreSQL
Testing:	Jest, Playwright, unit testing, integration testing, TDD
Platform & Tools:	Docker, Kubernetes, Git, Azure DevOps, Azure Pipelines, Azure OpenAI,

EDUCATION

The Pennsylvania State University *2018 - 2022*
B.S. in Computer Science
